REPLY TO RESTRICTION REQUIREMENT

Sir:

This response is being filed in reply to the outstanding Office Action, mailed March 28, 2003, in connection with the above application.

In reply to the outstanding Restriction Requirement, Applicants hereby elect, with traverse, Group VI (claims 30-40), drawn to an isolated guide RNA. Applicants traverse this restriction requirement based on the reasons which follow.

Applicants note that according to MPEP §803, two criteria must be met for a proper restriction requirement: a) the inventions must be independent or distinct as claimed; and b) there must be a serious burden on the Examiner if restriction is required.

Applicants respectfully submit that in this case, the Examiner has not shown that there would be a serious burden in examining the Groups set forth in the restriction requirement. In particular, Applicants note that it appears that the search for Groups VI

and Groups I, II, IV, and VII would be co-extensive. Claims of these groups are directed to the same mechanism, that is, inactivating a target gene by double stranded RNA (dsRNA), regardless of compositions or methods thereof. In fact, Groups II, VI, and VII are classified in the same class 435. It appears that a search covering the subject matter of Group VI would cover the subject matter of Groups I, II, IV, and VII as well. Thus, Applicants respectfully submit that the inventions of Groups I, II, IV, VI, and VII can be efficiently searched and examined together without placing a significant additional burden on the Examiner. Therefore, reconsideration and withdrawal of the restriction requirement is respectfully requested.

The Examiner may address any questions raised by this submission to the undersigned at 617-951-7000. Should an extension of time be required, Applicants hereby petition for same and request that the extension fee and any other fee required for timely consideration of this submission be charged to **Deposit Account No. 18-1945**.

Respectfully Submitted,
